PRODUCT EVALUATION

WIN-1683

Effective Date: November 1, 2012

Reevaluation Date: **May 2016**

The following product has been evaluated for compliance with the wind loads specified in the **International Residential Code (IRC)** and the **International Building Code (IBC)**.

This product evaluation is not an endorsement of this product or a recommendation that this product be used. The Texas Department of Insurance has not authorized the use of any information contained in the product evaluation for advertising, or other commercial or promotional purpose.

This product evaluation is intended for use by those individuals who are following the design wind load criteria in Chapter 3 of the IRC and Section 1609 of the IBC. The design loads determined for the building or structure shall not exceed the design load rating specified for the products shown in the limitations section of this product evaluation. This product evaluation does not relieve a Texas licensed engineer of his responsibilities as outlined in the Texas Insurance Code, the Texas Administrative Code, and the Texas Engineering Practice Act.

Installation:

System 1: The wood wall framing members shall be minimum Spruce-Pine-Fir dimension lumber. The window shall be secured to the wood wall framing using the frame of the window with minimum No. 10 x 2 ½" screws. Along the head and sill, the fasteners are spaced approximately 6 inches from each corner and one (1) at the mid span. Along each side jamb, the fasteners are spaced 6 inches and 16 inches on center. The fasteners shall be long enough to penetrate a minimum of 1 ½ inches into the wall framing members. Note: Refer to drawing entitled "Atrium Series 8900 Picture Window Finless Installation," Sheet 3 of 5, dated 4-09-2012, for an illustration of the installation requirements.

System 2: The wood wall framing members shall be minimum Spruce-Pine-Fir dimension lumber. The window shall be secured to the wood wall framing using the frame of the window with minimum No. 10 x 2 ½" screws. Along the head and sill, one (1) fastener shall be located at the mid span of each individual window. Along each side jamb, the fasteners are spaced 6 inches from each corner and 16 inches on center. Each mullion is secured to the head and the sill with an aluminum mullion clip (3.50" x 2.50" x 0.125"). The clip is secured to the wall framing with two (2) No. 10 x 2 ½" screws. The clip slides into the vertical mullions and is not secured with fasteners. The fasteners shall be long enough to penetrate a minimum of 1 ½ inches into the wall framing members. Note: Refer to drawing entitled "Atrium Series 8900 Picture Window Muller Finless Installation," Sheet 4 of 5, dated 4-09-2012, for an illustration of the installation requirements.

Note: The manufacturer's installation instructions shall be available on the job site during installation. All fasteners shall be corrosion resistant as specified in the International Residential Code (IRC), the International Building Code (IBC), and the Texas Revisions.
